EDUCATION

B.S. in Artificial Intelligence <i>COMSATS University Islamabad, Lahore Campus — Lahore, Pakistan</i> • Concentrations: Programming & Intelligence and Modeling • Relevant Coursework: Data Structures & Algorithms, Knowledge Representation & Reasoning, Operating Systems, Agent-Based Modeling (NetLogo), Object-Oriented Programming, Programming for AI, Web Technologies, Computer Organization & Assembly Language, Database, Artificial Intelligence	Expected May 2028
---	-------------------

EXPERIENCE

Ambassador <i>GirlScript Summer of Code — Lahore, Pakistan</i> • Working, connecting and collaborating with peers in open-source.	May 2026 – Present
Campus Mantri <i>GeeksForGeeks — Lahore, Pakistan</i> • Connected peers with industry professionals and facilitated collaborative learning opportunities	Feb 2026 – May 2026
Content Lead <i>Interaction Design Foundation (IxDF), Lahore Chapter — Lahore, Pakistan</i> • Planned, edited, and published UX/design content to grow chapter engagement • Coordinated with the local team to maintain a consistent content calendar	Oct 2025 – Feb 2026
Volunteer — Media & Events Team <i>GDG Cloud Lahore — Lahore, Pakistan</i> • Managed social media coverage and on-ground event logistics for developer community events	Jul 2025 – Mar 2026
Programming Intern <i>Ilm O Irfan Technologies — Lahore, Pakistan</i> • Developed and debugged Python-based projects, applying OOP principles (inheritance, encapsulation, polymorphism) • Gained hands-on experience with file handling, exception management, and multi-level menu-driven systems	Jul 2024 – Sep 2024
Tutor & Content Writer <i>Freelance — Lahore, Pakistan</i> • Tutored students across multiple grades in core subjects, adapting teaching style to individual learning needs • Produced written content for various digital platforms including blogs and creative publications	2017 – Present

PROJECTS

MindWell Lab Edition — AI Mental Health Journaling App (AI Accelerator Competition) • Built a mental health journaling application for young adults featuring an Explainable AI (XAI) engine that provides transparent insights with reasoning, evidence, and confidence scores • Merged three independently built prototypes (MindWell, MirrorLab, MindEase Haven) into a unified app with mood tracking, guided journaling, breathing tools, and a Support Bot • Developed as a competition entry for the AI Accelerator program, with XAI transparency as the core differentiator	2026
Skilline — Interactive Learning Platform (Frontend) • Built a visually rich, dark-themed multi-page website using Bootstrap 5, HTML/CSS/JS with cinematic video background, gold accents, and animated UI elements • Implemented a Twine-inspired layout with browse, profile, and post-job pages; resolved z-index layering bug blocking video playback	2026
Skill-Time Barter Site — Time-Banking Marketplace (Frontend) • Designed a time-credit marketplace with booking modal, category filtering, wallet, and profile pages using HTML/CSS/JS	2026
AI Disease-Finding Chatbot (Python)	2025

• Built a rule-based conversational chatbot to identify potential diseases based on user-inputted symptoms	
Library Management System (Python)	2024
• Implemented CRUD operations for book inventory and member records using file-based storage	
Blood Bank Donation & Campaign System (Group)	2025
• Collaborated on a donor-matching and campaign management system with a team	
Capstone Data Analysis Project (R)	2025
• Conducted exploratory data analysis and built visualizations using R and Tableau to derive insights from a given dataset	
Other Projects	
• Phonebook, Tic-Tac-Toe Game, Smart City System, Website Auditor, PortfolioBot	

PUBLICATIONS

Published Author

TWS Publications

- Contributed to two published anthologies: *Paper Daughters* and *Everything in Between*
- Written across creative fiction and poetry; also active in content writing for digital platforms

SKILLS

Programming Languages: Python, C++, C, Java, R, HTML/CSS/JavaScript, Assembly Language

Frameworks & Tools: Bootstrap 5, jQuery, NetLogo, Git, GitHub, VS Code, PyCharm, Jupyter Notebooks, IntelliJ, CLion, Kaggle, Tableau, Neo4j

Areas of Interest: Artificial Intelligence, Machine Learning, Knowledge Representation, Robotics, Agent-Based Modeling

Soft Skills: Technical writing, content creation, event coordination, tutoring

ACTIVITIES & LEADERSHIP

IEEE RAS (Robotics & Automation Society)	Feb 2024 – Present
<i>COMSATS University Islamabad, Lahore Campus</i>	
• Active member learning foundational robotics concepts including circuit design and hardware interfacing through hands-on workshops	
GDGoc (Google Developer Groups on Campus)	2024 – Present
<i>COMSATS University Islamabad, Lahore Campus</i>	
• Participating member of the on-campus Google developer community	
DSA Boot Camp	Jul 2024
<i>Lahore, Pakistan</i>	
• Completed an intensive Data Structures & Algorithms boot camp covering core problem-solving techniques	
Oxford Reading & Book Review Program	2019 – 2021
<i>Lahore, Pakistan</i>	
• Participated in an annual reading and book review program, developing strong analytical writing skills from an early age
